WORK EXPERIENCE

Business Intelligence Developer | Banner Health (Contract) - Tucson, AZ

Jan 2025 - Aug 2025

- Developed a Python-based chronic disease prevalence analysis pipeline using CMS Medicare data across 28 Arizona counties, applying midpoint estimation, OLS regression, and capacity planning models to identify high-burden populations
- Built an interactive Power BI dashboard to track cloud migration readiness, defining 8 KPIs with drill-down views and user guides that enabled non-technical stakeholders to independently navigate and action migration priorities
- Designed a scalable SQL schema and integrated Generative AI to automate reporting summaries, reducing cloud costs by 35%
- Managed sprint backlogs and coordinated cross-functional delivery across the full SDLC using JIRA, aligning engineering, analytics, and clinical operations teams to consistently meet project milestones
- Automated ERP-CRM data reconciliation using PostgreSQL multi-layered CTEs and complex JOINS, eliminating manual processing bottlenecks and saving \$20K annually in operational costs

Technical Solutions Engineer | ReNew Communities - Chicago, IL (Remote)

May 2025 - Aug 2025

- Built and deployed serverless internal tools using AWS Lambda and API Gateway with Python, automating volunteer data extraction from SignUpGenius into Smartsheet CRM with append-update logic, cutting manual data entry by 95% and enabling real-time operational visibility
- Developed a dynamic web-based reporting tool with an HTML/JavaScript front-end, dropdown property selector, task search, and CSV/PDF export, embedded directly into a Smartsheet Dashboard via AWS Lambda and API Gateway for construction site progress tracking across 50+ properties
- Migrated Selenium automation scripts to fully cloud-based execution on AWS Lambda using Docker, enabling dynamic test execution via Lambda Test Events
- Integrated GitHub with AWS to enable direct code builds from Git branches, configured Lambda Layers for shared Python utilities, and maintained production/dev branch separation across all internal tool deployments

Software Engineer | AllReal - Coimbatore, India (Remote)

Mar 2022 - Apr 2024

- Built a Python budgeting tool using regression analysis to forecast costs for 4 product launches and developed a parameterized interface allowing users to generate custom cost projections
- Created an interactive Tableau dashboard to track VR clinical performance and identified a 40% increase in trainee skill retention, which helped secure \$35K in new partnerships
- Developed and launched a full-stack web application using JavaScript and Node.js to manage company data, serving as the primary interface for institutional partners
- Translated requirements from 12 institutional partners into functional specifications for application features and data models, ensuring development priorities aligned with partner use cases and budget constraints
- Migrated 30K+ clinical session records to a centralized Snowflake data warehouse, designing the schema and ETL logic from scratch to enable cross-institution performance analytics and support the company's first large-scale research studies

ACADEMIC PROJECTS

Inventory Management System - Trader Joe's | Oracle APEX, SQL, PL/SQL, SSIS, Python, MS Project, MS Visio

Dec 2025

- Built a full-stack retail solution using Oracle APEX integrating SSIS ETL pipelines and PL/SQL triggers into a front-end interface with interactive store revenue visualizations and automated CRUD functionality for data-driven inventory management
- Designed a centralized database with 35+ ERD entities and used complex SQL queries to identify seasonal demand trends

Budget Risk Financial Modeling - American Express | Tableau, MS Excel, MS PowerPoint

Nov 2025

- Delivered a Tableau HR Analytics solution for a business case simulation that identified a 16.12% attrition rate concentrated in the \$2K-\$4K income bracket

Loan Portfolio & Risk Exposure System | MySQL, Tableau

Aug 2025

- Executed advanced quantitative risk modeling using SQL and Python, performing sensitivity analysis on a \$144.6M portfolio, which identified key risk drivers, optimized LGD projections, and delivered insights via a [Tableau dashboard](#)

LEADERSHIP & HONORS

Graduate Teaching Assistant, University of Arizona

Aug 2025 - Dec 2025

1st Place in Eller Data Analytics Competition, University of Arizona

Aug 2024

EDUCATION

University of Arizona | Tucson, AZ

M.S. in Management Information Systems

Dec 2025

(GPA: 3.9)

Sri Venkateswara College of Engineering | India

Bachelor of Engineering in Computer Science and Engineering

Jul 2024

(GPA: 3.6)

TECHNICAL SKILLS

Programming Languages: Python, R, Java, JavaScript, C++, Bash/Shell Scripting, HTML, CSS, SQL

Data Visualization & Analytics: Tableau, Power BI, Snowflake, Looker, Qlik, Alteryx, Dashboard Design, Data Processing

Data Engineering & ETL: SSIS, ETL/ELT pipelines, Airflow, Oracle, Shell Scripting, dbt

Tools & Frameworks: AWS (Lambda, S3, RDS), Azure, Node.js, React.js, Docker, Git, MS Office, Smartsheet

Project Management: Agile, SDLC, JIRA, ServiceNow, Workday, Salesforce, Confluence, Trello, Asana, MS Project, UAT
